

Ahmet Sakalli

Software Engineer

Work Experience

Aug 2021 – Present

CreditWest Bank | Nicosia, Cyprus

Software Developer

Developed high-performance single-page applications (SPAs) for internal use with Angular, mastering advanced concepts like RxJs, NgRx, and Observables.

Engineered REST API services using .NET Core for server-side internal software, and adopted Domain-Driven Design Architecture to enhance application scalability and maintainability.

Also, performed VB.NET development in the legacy system as needed.

Acted as the primary liaison for billing operations, coordinating with stakeholder firms to address issues, managing operational workflows and reporting through PL/SQL, and collaborating with cross-functional teams to resolve complex problems.

Orchestrated the digital transformation of data transfer between local municipalities and the bank from a manual FTP-based process to a streamlined online system, supervising integration testing and operational rollout in partnership with municipal software vendors.

Automated pre-production tasks by developing shell scripts on Linux, scheduling crontab updates for Oracle-based municipal links.

Contributed to Oracle development by implementing procedures, functions, and reports, and executed data migration projects, transferring records from MSSQL to Oracle.

Upgraded the Angular project from version 7 to 9, improving application performance and user experience.

Oversaw project controls and guided the deployment process across testing, pre-production, and production environments, ensuring successful rollouts.

- TypeScript 3.8 • Angular 9 • Responsive Web Design • C#/.net Core 8
- Entity Framework Core • T-SQL Development • PL/SQL Development
- SSRS • Design Patterns • DDD Architecture • Terminal • SPA
- LINQ • VB.net

Nov 2020 – Mar 2021

101Evler.com | Nicosia, Cyprus

Junior Web Developer

Contributed to the development of the 101evler website by implementing interactive components using React.js for incremental improvements.

Enhanced my proficiency in server-side development through the use of PHP and Symfony.

- React.js • Php/Symfony • Webpack • Responsive Web Design
- Interactive Design

Projects

Mckenzie Residence Reservation System – 2021

This project was a freelance endeavor in which a reservation system was designed for McKenzie Resort. I was responsible for the backend, developing the REST API infrastructure using Node.js and Express.js.

Portfolio project – Still in progress

After gaining industry experience since 2021, I decided to create a portfolio website to better present my skills. This project will utilize Angular 18, AWS/Lambda, Docker and Figma. It is currently still under development.
